

INDUSTRIAL VENDING SOLUTIONS

FOR US, IT'S PERSONAL

VENDING SOLUTIONS THAT CONTROL ACCESS & REDUCE COSTS

Consumables such as personal protective equipment, tools, or machines with irregular, unpredictable requirements play a significant role in your company's balance sheet. Their procurement, or a shortage of supplies, can cost you and your team efficiency, time, and money.

As part of our inventory management solutions, Würth offers a comprehensive vending machine concept for these operating supplies, from their supply and storage, to provision, to fully automated replenishment. Our solutions allow your team to access safety equipment, industrial supplies, power tools, adhesives, and other consumable items.

Along with reducing costs in your supply chain and inventory requirements, our vending solutions let you set employee usage restrictions by product or machine for inventory control.

WE'LL CUSTOMIZE A SOLUTION THAT FITS YOUR NEEDS

We have the tools and flexibility to design a unique program that fits your specific needs. Your personal Specialist will work with you to:

- Meet your individual inventory needs and goals
- Save time and money by keeping your inventory organized
- Provide robust reporting to manage your supply chain
- Answer your questions and make recommendations
- Coordinate with you every step of the way to achieve maximum results and optimum cost savings

Vending

Rugged machines provide immediate, point-of-use access to the tools and supplies your workforce needs to get the job done. With vending, you'll get a clear view of inventory, transparency to usage, and easy-to-use reporting.

Crib Management

You can streamline the way you manage all your supplies and inventory. With our wide selection of storage systems, you can organize everything from small to large, and keep track of it all by using our barcode scanning technology and robust reporting.

On-Site Services

We can provide inventory solutions personnel at your location, providing complete turn-key inventory management.

Customized Solutions

We'll come to your facility to determine your exact needs and build a custom solution for you.

VENDING MACHINE EXAMPLES

Helix (Coil) Machines

Looking for maximum flexibility and configurations? These high security machines can be configured for all your single small-to-medium sized consumables. You'll get full visibility of product availability and usage, so you know what's on hand at all times.

Specifications	
Name:	SupplyBay®
Security Level:	Very high
# of SKUs:	70 maximum
Types of Items:	Small-to-medium consumables
Main Exterior Dimensions:	72" H X 41" W X 34 1/8" D
Auxiliary Exterior Dimensions:	72" H X 41" W X 34 1/8" D

Lockers

Medium-to-very-high security lockers are perfect for securing your large or irregularly shaped consumable and returnable materials. You'll gain product-level control and the capability to track items that need to be checked out and returned. This is a great option for power tools, hand tools, radios, boxed items, and more.

Specifications
